

Ethan Young's Resume

14620 189th Ave NE Woodinville, WA 98072 • (425) 577-1189 • Ethan2ky@Gmail.com

VALUE OFFERED

Ethan is a tape junkie who specializes in Football Scouting and Talent Evaluation, complementing his film work with unique and empirical Player Personnel Research. Proficient in Azure Machine Learning, R Programming, MYSQL Database Management, and Simulation Modeling; Ethan puts all these skills together to create Strategic Intel that empowers high level decision making in football.

OaSIS - Head of Strategic Intel (Current)

OaSIS provides strategic intel to NFL decision makers. Notable projects on the OaSIS platform I have created:

- Slaytics: A talent predictive system that uses macro measurables, past data, and machine learning to identify prospects with the highest and lowest chances at NFL success. Since 1999, Upper Bound groupings have had a 55.9% higher success rate than than Lower Bound counterparts.
- MAVEM: A valuation language that quantifies trades, free agent signings, and player acquisition hypotheses.
- Expected Sacks: A pressure generated sack peripheral that predicts future sack progression and regression. Expected Sacks correctly predicts the direction of future sack performance in outlier groups 89.2% of the time.
- NFL Draft Simulation Model: Simulates the NFL Draft using a consensus Big Board and a Team Needs Index, for strategic data mining and draft planning.

Bleacher Report - NFL1000 Pro Scout (Current)

Bleacher Report is a sport focused website.

- NFL1000 ranks every player in the NFL based on scouts weekly performance grades.
- Headed up interior offensive line grading, watching tape of every NFL offensive guard and center on a weekly basis.
- Analyzing technique, physical traits, as well as overall performance.
- Write in depth articles detailing what I see on tape.

Inside the Pylon - NFL Scouting and Player Personnel Research

Inside the Pylon is a website focusing on NFL and NCAA Football news and analysis.

- Unique articles about my player personnel research and the NFL Draft.
- Wrote scouting reports on NFL players and prospects.
- Articles consistently among most viewed on website.
- Watched film and graded over 350 prospects before the 2016 NFL Draft.

House of Matriarch - Marketing/Data Analysis

House of Matriarch is a high end fragrance brand.

- Built backend ingredients database from ground up.
- Created metrics to aid in marketing decisions.
- Oversaw video marketing campaigns.
- Set up venture capital presentations and pitched to angel investors.

HISTORY

- Winner of the first NFL Network Scouting Competition, judged by Daniel Jeremiah and Bucky Brooks.
- Trained at Driveline Biomechanics Lab, a haven for player development innovation and sports science technology .
- Voted Top Pitcher in Best of the West 18U GSL Baseball Tournament.
- High School Coach.

EDUCATION

Cascadia College

- Business Management Degree.
- Additional coursework in Statistics.
- Completed degree before graduating High School.
- Academic Honor Roll.
